# **Completions**

#### **Educational Attainment**

The percentages of 25- to 29-year-olds who have completed high school, some college, or a bachelor's degree or higher have increased since 1971, but racial/ethnic differences in levels of educational attainment remain.

In 2003, some 87 percent of all 25- to 29-year-olds had received a high school diploma or equivalency certificate, and many of these young adults had received additional education. Although this percentage represents an increase since 1971, the high school completion rate has been at least 85 percent since 1976.

In 1971, Blacks were considerably less likely than Whites to have completed high school (59 vs. 82 percent) (see supplemental table 23-1). Although Blacks have narrowed the gap, their high school completion rate was still below that of Whites in 2003 (88 vs. 94 percent). The high school completion rate for Hispanics also increased between 1971 and 2003 (from 48 to 62 percent), but Hispanics, unlike Blacks, have not made measurable progress in closing the gap with Whites.

Overall, the percentage of 25- to 29-year-olds who completed at least some college increased from 34 to 57 percent between 1971 and 2003 (see supplemental table 23-2). However, increases were not even throughout the entire period. The completion rate increased during

the 1970s, leveled off during the 1980s, increased in the early and mid-1990s, and has leveled off since then. The overall upward trend reflects the overall pattern of change in the propensity of high school graduates to enroll in college immediately after completing high school (*indicator 20*).

The percentage completing some college increased between 1971 and 2003 for each racial/ethnic group, but less for Hispanics than for Whites or Blacks. In 2003, 57 percent of all 25- to 29-year-olds had completed some college, with Whites (66 percent) more likely than Blacks (51 percent) or Hispanics (31 percent) to have done so.

Twenty-eight percent of 25- to 29-year-olds had at least a bachelor's degree in 2003, up from 17 percent in 1971 (see supplemental table 23-3). In general, the rate for completing a bachelor's degree or higher was roughly half the rate for completing some college. Although the percentage with a bachelor's degree or higher increased for all three racial/ethnic groups, the gap between Whites and Blacks and between Whites and Hispanics widened over time.

<sup>1</sup> Included in the totals but not shown separately are other racial/ethnic categories.

NOTE: "High school completers" also includes those with higher levels of education, and "some college" also includes those with a bachelor's degree or higher. The questions about educational attainment were reworded in 1992. Before then, "high school completers" meant those who completed 12 years of schooling and "some college" meant 1 or more years; beginning in 1992, they meant those who received a high school diploma or equivalency certificate and any college at all, respectively. In 1994, the survey instrument for the Current Population Survey (CPS) was changed and weights were adjusted. See supplemental note 2 for further discussion. Some estimates are revised from previous publications. Black includes African American and Hispanic includes Latino. Race categories exclude Hispanic origin unless specified. <sup>&</sup>lt;sup>1</sup> Included in the totals but not shown separately are other racial/ethnic categories.

NOTE: The Current Population Survey (CPS) questions used to obtain educational attainment were changed in 1992. In 1994, the survey instrument for the CPS was changed and weights were adjusted. See *supplemental note* 2 for further discussion. Some estimates are revised from previous publications. Black includes African American and Hispanic includes Latino. Race categories exclude Hispanic origin unless specified.
